SUMMARY

Product manager and AI-native builder who takes ambiguous customer problems from discovery through launch. Shipped LLM and analytics products, translated customer research into roadmap priorities, and built customer-facing prototypes with coding agents and APIs. Earlier venture investing experience across 40+ software companies brings a quantitative lens to product strategy, monetization, and market dynamics.

EXPERIENCE

NEWMINE

San Francisco, CA

GTM Lead, Product

May 2025 – June 2026

- Originated and launched Talk to Your Data, Newmine's first LLM product, which became the flagship product experience across 20 enterprise customers and the primary interface for accessing margin intelligence.
- Expanded KeepScore from a returns scoring tool into an enterprise intelligence product spanning 10+ evaluation dimensions and 7 to 8 retail workflows across 4+ business functions.
- Synthesized 9 enterprise retailer evaluations into 6 roadmap priorities, contributing to 4 shipped capabilities across KeepScore and adjacent margin intelligence products.
- Shaped generative AI capabilities for Voice of Customer, analyzing 125K+ feedback records across 7 channels and 5 decision levels to surface product, vendor, and margin risk.
- Helped shift Newmine's product strategy from returns reduction to AI margin intelligence and redesigned packaging around modular capabilities, increasing enterprise contract values from roughly \$200K to \$250K ACV to \$350K to \$450K ACV.

CALLIDUS

Houston, TX

Product Manager

October 2022 – May 2025

- Worked across 12 AI startups, translating ambiguous customer problems into prioritized use cases, MVP concepts, and customer facing prototypes.
- Synthesized 45 customer conversations into workflow and feature priorities, helping teams validate product direction before committing additional development resources.
- Built interactive AI prototypes using Cursor, Vercel, APIs, and LLMs, cutting prototype production time roughly 50%; tested concepts across 23 customer sessions, with 7 advancing to paid pilots.
- Prioritized product investments across AI startup engagements by weighing customer demand, technical feasibility, and commercial value before prototype build.

WARBURG SERRES / AQUARIUS FINANCIAL

Boston, MA

Growth Lead

March 2022 – September 2022

- Advised 25+ portfolio companies on market strategy, business models, growth, and capital allocation across early stage software businesses.

Venture Analyst

January 2020 – March 2022

- Led diligence on 40+ early stage fintech, payments, and B2B SaaS companies and tracked 17 portfolio companies across product progress, operating performance, and capital efficiency.

PROJECTS

DRAFT TICKER

2026

Fantasy Football Market Intelligence

- Built and deployed Draft Ticker on the FantasyPros API, a consumer fantasy football product that interprets ADP and ECR movement using verified catalysts and preseason context.
- Scoped the MVP around redraft users, defined deterministic signal rules and an AI eval contract, and identified and corrected two measurement defects through manual QA.

EDUCATION

UNIVERSITY OF TEXAS AT AUSTIN, McCombs School of Business

Austin, TX

Bachelor of Business Administration
